INTRODUCTION

BIG BANG

Is A Decentralized Smart Contract For The World Class System.

BIG BANG

Big Bang Is Giving You The Facility To Build And Open Your Own World Class Business Along With The Opportunity To Open A World Class Account.

BIG BANG

Big Bang Is A Decentralized Platform Based On Smart Contracts, Which Connects People Around The World And Opens Up Unlimited Possibilities Of The New Economic Financial System.

BIGBANG
THE NEXT GENERATION

WHAT IS CRYPTOCURRENCY ?

A "100% Decentralized Cryptocurrency" Is A Cryptocurrency That Is Completely Decentralized And Does Not Require Any Central Authority Or Control. This Means That All Decision-making Processes, Network Structures, And Operations Of This Cryptocurrency Are Based On The Cooperation And Coordination Of Community Members.

Some Important Features Of 100% Decentralized Cryptocurrencies Are:

Network Structure: This Cryptocurrency Is Based On A Protocol In Which All Members Act As Nodes Of The Network And Manage And Secure The Network. No Single Organization Or Authority Controls The Network.

Independence: Members Have Complete Control And Autonomy, And No Single Organization Or Individual Can Influence The Accounts Or Transactions Of These Cryptocurrencies.

Security: This Cryptocurrency Uses Cryptographically Secure Technology, Ensuring The Security And Confidentiality Of All Transactions And Data.

Privacy: All Transactions In This Cryptocurrency Are Stored On A Public Blockchain, But The Identity Of The User Remains Confidential. No Third Person Or Organization Can See The Identity And Related Information Of These Transactions.

Fairness: All Decisions In This Cryptocurrency Are Taken On The Basis Of Consensus And Coordination Of The Community. No Person Or Organization Can Disorganize, Update, Control, Or Influence Anything.

An Example Of A 100% Decentralized Cryptocurrency Is Bitcoin. There Is No Central Instance That Controls The Network. A Group Of Members Work On The Bitcoin Network And Coordinate To Verify Transactions And Manage The Blockchain.

BIGBANG
THE NEXT GENERATION

WHAT IS 100% DECENTRALISED?

"100% Decentralized" Means That A System, Protocol, Or Organization Is Completely Decentralized And Requires No Central Authority Or Control. By This Means, All The Decisions And Actions Are Taken Jointly By The Group And There Is A Single Controlling Authority Or Central Instance.

In 100% Decentralization, The Process Of Decisions, Collection Of Data, Management, And Network Functions Are Shared Among All Relevant Members. This Means That No Single Organization, Government Body Or Agency Makes Decisions In The Context And All Members Are Organized On An Equal Basis.

Decentralized Systems Are Used In Various Fields, Such As Cryptocurrencies, Blockchain, Decentralized Finance (Defi), Decentralized Applications (Dapps), And Other Technologies And Services. In A Decentralized System, All Members Of The Network Have Equal Rights And Access, And Their Coordination And Cooperation Is Required For The Progress And Security Of The System.

If A System Is Said To Be "100% Decentralized", It Does Not Require An Individual Or Central Instance To Make Decisions In The Basis Of The Organization, And All Processes Are Coordinated And Determined By The Group

BIGBANG
THE NEXT GENERATION

WHAT IS 100% SMART CONTRACT?

A "100% Smart Contract" Is A Smart Contract That Is Fully Automated And Does Not Require Any Single Or Human Interaction. This Contract Is Based On Cryptocurrency Technology And Executes Actions According To Its Own Rules And Smart Code.

Some Important Features Of 100% Smart Contracts Are:

Automation: Smart Contracts Automate And Perform Actions Based On Terms And Conditions Specified By Users.

Trust: Smart Contracts Are Based On A Cryptographically Secure Protocol That Ensures Rules Are Followed And Any Errors Are Reported.

Compliance: The Smart Contract Has Full Compliance With The Regulations And There Is No Human Error Or Undue Influence.
Independence: The Smart Contract Is Initially Created By The Creator And Does Not Require Any Single Authority Or Individual.

Transparency: Information On All Transactions And Actions Of Smart Contracts Is Established On A Public Blockchain, Providing Complete Information To All Affected Parties.

For Example, A Smart Contract Based On The Ethereum Blockchain Can Be Pronounced As A 100% Smart Contract. It Uses Smart Code As A Constitution Based On User Customizable Rules, Allowing Them To Cryptographically Securely Trust Relationships And Conditions Specified Among Themselves.

BIGBANG
THE NEXT GENERATION

WHAT IS 100% DISTRIBUTION?

"100% Distribution" Means That The Property, Money, Or Resource In Question Is Fully And Equally Distributed Among All Related Parties Or Members. This Means That In Any Partition, Partition Or Distribution Process There Is No Reciprocity Or Residual And All The Parties Are Entitled To Receive The Same In Full.

This Principle Of Distribution Is Used In Various Fields, Such As Interest In Economic Institutions, Refunds And Reversals To Customers, Benefits In Business
Relationships, Distribution Between States In Publications For Sharing Of Material, And The Sharing Of Data Across The Internet And Websites. To Do Etc.

In This Context, "100% Delivery" Can Be An Authenticity Or Performance Standard That All Relevant Parties Are Ensured To Meet. This Is Possible Through Technical Measures, Agreements, Or Agreements That Ensure That Resources Or Results Are Distributed Among All Parties To The Execution.

BIGBANG
THE NEXT GENERATION

WHAT IS 100% TRANSPARENCY?

"100% Transparent" Or "Completely Transparent" Means That All Information And Decision-making Of A Process, Organization, Or Institution Is Fully And Equally Available To All Concerned Parties Or Members. This Means That No Relevant Information, Decision Or Action Is Hidden Or Secret, And All Members Have The Right To Access It.

100% Transparency Is An Important Denomination And Is Used In A Variety Of Sectors, Such As Businesses, Governments, Corporations, Non-profit Organizations, And Financial Institutions. It Is Used For Government Spending, Project Creation, Company Financial Reporting, For The Whole Process Of Organization And Pension Planning Etc.

Being 100% Transparent Means That Accurate And Precise Information Is Available To All Concerned Parties And There Is No Confusion Or Ambiguity. This Is Most Likely Achieved Through Openness, Regular Reporting, Management Process, Organizational Structure And Methods. Its Use Enhances Trust, Integrity, And Stability In Relationships.

BIGBANG
THE NEXT GENERATION

WHAT IS 100% CALCULATIVE ?

"100% Calculative" Is A Claim Regarding A Number Or Process That Is Believed To Be Completely Enumerable Or Counting. This Claim Means That There Will Be No Errors Or Inconsistencies In The Process And The Result Will Be 100% Accurate And Sure.

This Claim Is Commonly Heard In Numerical Or Calculative Procedures Involving Data, Such As:

"100% Calculative Answer" Or "100% Correct Answer": When The Answer To A Question Is Calculated In Accordance With This Claim, It Is Considered To Be A "100% Calculative Answer" Or "100% Correct Answer"

"100% Calculative Process": When The Result Or Output Of A Process Is Obtained In A 100% Calculative Manner, It Is Said To Be A "100% Calculative Process".

However, If A Process Is Not 100% Accurate Due To Various Reasons Or Due To Errors, It Cannot Be Said To Be "100% Calculative". Calculative Procedures Often Take Advantage Of Special Mechanistic Relationships And Shared Variances, But These May Also Contain Errors That Require Modification.

BIGBANG
THE NEXT GENERATION

WHAT IS 100% GLOBAL NON-WORKING?

"100% Global Non Working" Is An Administrative Or Business Term Meaning That A Person Or Organization Does Not Operate Entirely Internationally, Even In Different Locations. This Means That They Are Not Required To Work From A Fixed Location, And Can Work From Any Location As Per The Requirement.

It Is A Modern Program And Business Model In Which You Are Not Constrained In A Brick And Mortar Office And Can Handle Your Work From Remote Locations As A Digital Traveler Through Your Personal Or Professional Devices.

"100% Global Non Working" Means That This Person Or Organization Is Not Required To Operate From Any Particular Location. They Travel To Different Places, But They Are Allowed To Work Using Digital Devices Even While Traveling. In This Manner, They Can Handle Their Travel As Well As Their Work And Work Internationally.

This Program Is Possible For Most Digital Business Or Financial Services Consumers And Companies In Which A Major Element Of Work Is The Internet And Digital Communications. This Helps The Individual Or Organization To Achieve The Highest Speed, Efficiency, And Productivity In Their Work.

WHAT IS BLOCKCHAIN?

BIGBANG
THE NEXT GENERATION

“Blockchain” Is A Blockchain That Is Completely Decentralized And Functions Without Any Central Authority Or Control. All Members Act As Nodes Of The Network And Share The Security, Privacy, And Management Of The Network. Let's Combine.

Some Important Features Of Blockchain Are:

Network Structure: All Members Act As Nodes Of The Network And Cooperate In The Security, Operation And Management Processes Of The Network. No Central Authority Controls The Network

Privacy: Cryptographic Techniques Are Used To Protect The Confidentiality Of Transactions And Data Between Members. Thus, Users' Privacy And Information Security Is Ensured.

Autonomy: Members Have Complete Control And Autonomy, And No Central Authority Can Influence The Data Or Decisions Of These Blockchains

Organized Decision-making Process: Organized Criteria And Community Cooperation Are Used To Make Decisions Based On Consensus Among Members. This Ensures That All Members Have An Equal Contribution To The Conversation, Decision Making And Development.

Open Source: Most Blockchain Projects Are Open-source, Which Means That Their Source Code Is Viewable By Everyone And Has The Ability To Improve, Test Security, And Collaborate.
